Abstract of DE10039982

The invention relates to adhesive tape for enveloping elongated material, particularly looms of cables, comprising a non-woven base support, with at least one side having an adhesive covering, wherein the support has an area weight of 20 - 80 g/m², particularly 35 - 50 g/m². The invention is characterised in that the adhesive tape has a sound absorption quality of 3 - 10 dB(A), particularly 4 - 6 dB(A), (measured according to BMW standard GS 95008-3 in May 2000).
